# FROM LIGHTING TO TRANSPARENCY

“In a world where we feel like we’re losing our bearings, where what we once took for granted now seems fragile, where truth is sometimes hard to discern, it’s really important to us that we provide you with more than just lighting, by being completely transparent about what we do.

At a time of energy crises, colossal ecological challenges, increasingly demanding expectations in terms of innovation, and in honour of our 50th anniversary, it is with great pride that we look back at the progress we’ve made while remaining confident as we look toward the future. Many boast of being the first, the best, the strongest.

And we’re fine with that. Because here at Blachere, our only goal is to light up cities, the places where we live with creativity, love and sincerity.”

Johan Hugues & Romain Allain-Launay , Co-CEO Blachere Illumination

# OUR *REALISATIONS*

# BIO PRINT

when nature helps  
to decorate

A revolutionary material to create **biodegradable, recyclable and colourful structures.**

Bioprint is derived from a GMO-free bio-sourced sugar cane transformed into dehydrated bioethanol in a French laboratory. The granules are dyed with clean dyes and this material is then injected into our workshops' 3D printers, so we can produce biodegradable, recyclable and colourful structures.

This process limits manufacturing scrap and allows for complete short-circuit recycling as we grind down our structures once they are no longer of use. Biodegradation is the decomposition of organic matter by microorganisms and has the advantage of minimising greenhouse gases.

# RECYPRINT

a plastic transformed  
into magical decorations

**500 billion** plastic bottles are produced each year, and many are discarded in nature or our oceans.

At Blachere, we have found a way to transform PET (polyethylene terephthalate) into decors that are as stunning as they are innovative!

Recycled bottles are sorted by colour and then ground into flakes. The resulting granules are then injected into our 3D printers to produce a unique blue decoration.

This method helps to limit greenhouse gas emissions and prevent as many plastic bottles as possible from polluting land and seascapes.

Our innovations are protected by numerous patents.

**Recyprint emit 10 times less CO2 than aluminium.**

**1 590 332 bottles already recycled to this day in Christmas decorations.**

# OUR RANGE OF ECORESPONSIBLE DECORATIONS

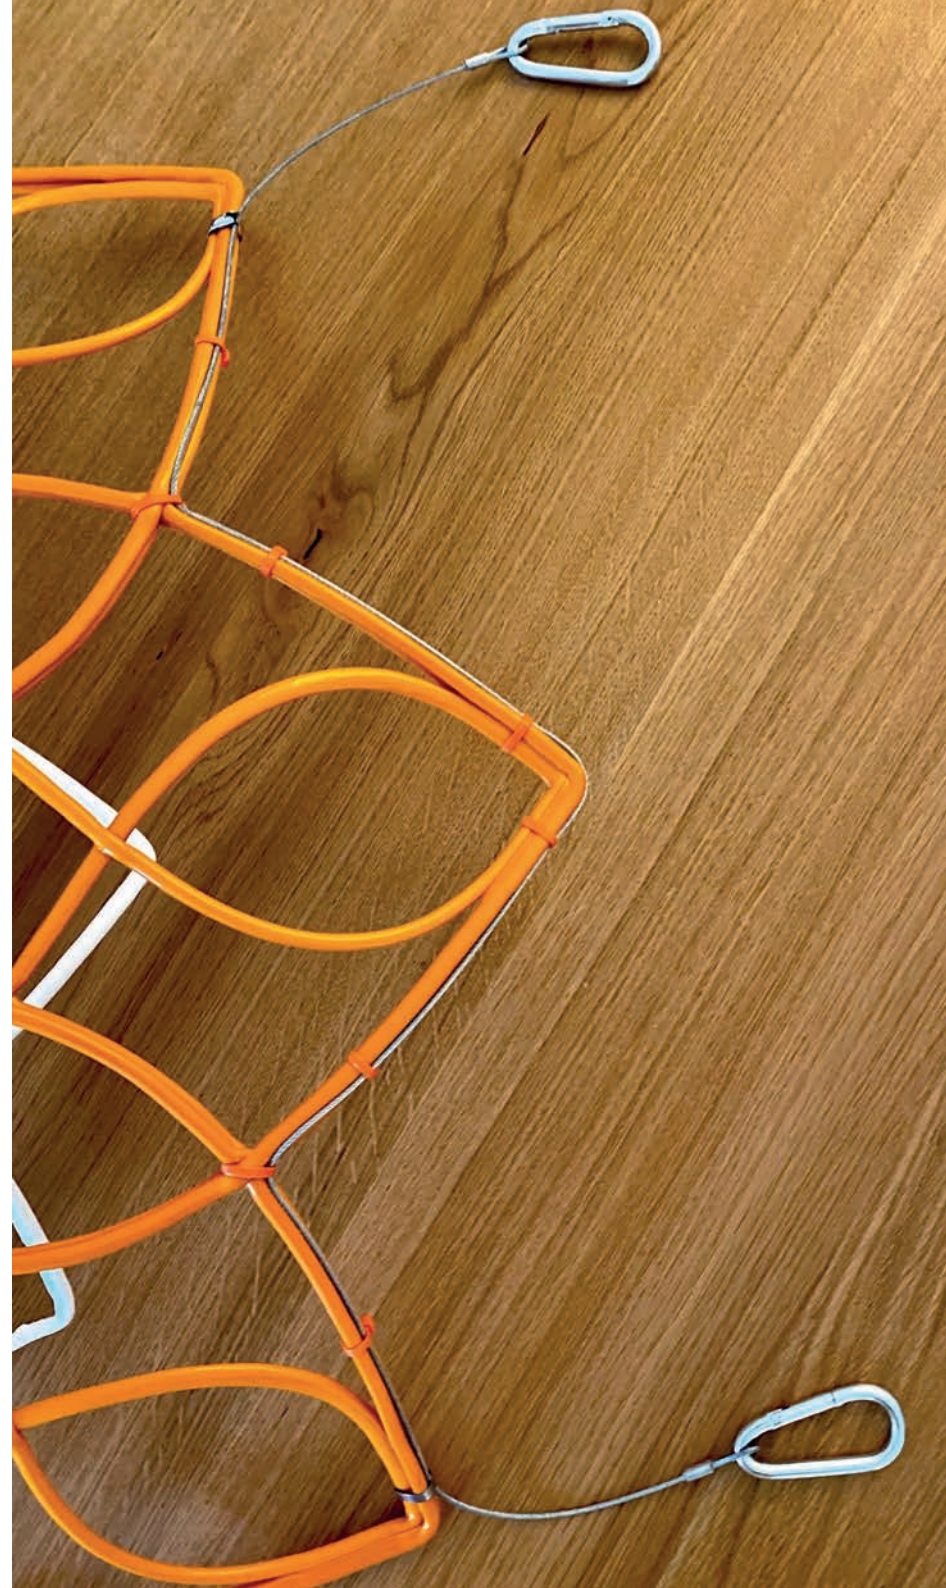

## BIOPRINT OR RECYPRINT RECYCLABLE AND BIODEGRADABLE STRUCTURE

The lighting components are wired onto a structure entirely made from our revolutionary new eco-responsible material, available in different colours.

## EASY HANGING SYSTEM

The decoration is easily suspended thanks to this resistant carabiner attached to the Bioprint structure by a stainless steel rope and collar.

# VOLUMES RANGE

# SORTING WASTE, can be child's play.

Encouraging today's youth to recycle is a major challenge that we have answered with creativity and humour. We have made this vital step a fun and playful collective act thanks to containers in the form of funny animals.
